Care Chemicals

Neither do we add heavy metals nor heavy metals containing compounds during the manufacturing process of this product nor are they contained in the raw materials used. As we therefore do not expect any heavy metals within this product, we do not test regularly for heavy metals. To demonstrate our statement to be correct we carried out tests on a few batches selected at random. These tests were carried out on the elements as listed below. In each case we could not find any result down to the respective detection limit, that means those elements were not detectable.

These figures are typical values and not part of our product specification. As a consequence they will not appear on a Certificate of Analysis.
